      <h1>About Us</h1>
      <p>This project is used to automate the loan eligibility prediction for the customer as the
cost of assets is increasing day by day and the capital required to purchase an entire assest is
very high. So purchasing it out of your savings is not possible. The easiest way to get the
required funds is to apply for a loan. But taking a loan is a very time consuming process. The
Application  has to go through a lot of stages and it's still not necessary that it will be approved.
To decrease the approval time and to decrease the risk associated with the loan we have
created this project</p>
      <div class="address">
        <ul>
